

The LOcHER Project

Scott Shelton & Rickie Thomas

Contents

- How it started
- Tyre safety
- Tyres by sight
- The original design
- ScORSA

How it started

- As a class we were tasked with making a designing something to do with health and safety within our college class
- We chose to focus on a design around an air freshener to do with tyre safety
- Our aim was to get our information to first time drivers and new car buyers

Tyre Safety

- Why is it so important?
- Can any of you here tell us what the tread on your tyres is for?
- Can you tell us the legal limit of tread is?
- Can you tell us what your tyre pressure needs to be?
- Can you tell us where you find out this information?

The good the bad and the ugly

Designs

Designs

- We started out with a few designs
- Emailing back and forth between Andy
- Then we heard ScORSA were interested in our LOcHER Project

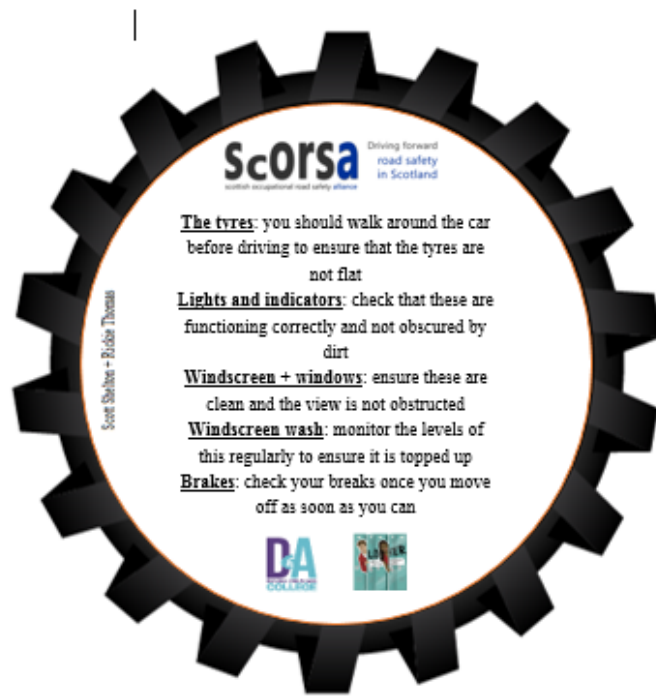

What ScORSA is?

- Scottish Occupational Road safety alliance
- ScORSA was created to provide free information and support to assist small and medium sized businesses to raise awareness.

ScORSA

Driving forward
road safety
in Scotland

This is what our final design looks like:

Driving forward
road safety
in Scotland

- We have been lucky enough that ScORSA liked this, they have now started to put this into production and we are awaiting on receiving the finished product.
- A big thanks to Andy Cathro for the influence on this project and thanks for listening.
